

Water Alarm

Pacific Digital WA-102 Water Alarm helps keep your home dry!

Model: **WA-102**

Use the WA-102 in any location in your home to prevent costly water damage! The Pacific Digital water alarm is small and discreet, using only one 9V battery that will power the unit for up to one year. Emitting a loud 100db/30cm buzzer, the WA-102 can be heard throughout the house, even if the unit is placed in a basement. The Pacific Digital water alarm even features a low-battery indicator. With no wiring and no assembly required, placing the original Pacific Digital WA-102 water alarm around your home is the simplest, and most cost effective way to avoid costly water damage.

FEATURES

- MCU Control
- Low Battery Chirp
- Alarm Buzzer Volume - 110 db/30cm
- Mountable Sensor
 - 5.9' remote sensor built in
- Operates on (1) 9V battery

Use the Pacific Digital WA-102 Water Alarm

- In the kitchen
 - Leaky pipes are a common source of water damage to expensive cabinetry
 - Dishwasher leaks are far too common and often go unnoticed until they ruin floors
- In the bathroom
 - Leaky or overflowing toilets can cause major floor, wall, and cabinetry damage
- In the basement
 - Washing machine leaks are some of the most common--and most destructive
 - Eliminate water heater bursts by detecting moisture at the first sign of leakage
 - Near your water line's main valve
